DIRECTIONS FOR USE
To ensure proper disinfecting, all steps listed below must be followed:

1. Wash your hands with mild soap. (Caution - pump soaps may contain oil-based suspension agents.)

2. After cleaning with Boston® Cleaner and rinsing thoroughly with fresh tap water, place lenses in empty lens case and fill to top ridges with fresh Boston Conditioning Solution. Soak lenses for at least four (4) hours (or overnight) before wearing. Always use fresh solution for soaking and storing lenses.

3. After removing lenses from the lens case, apply fresh Boston Conditioning Solution to wet lenses for additional cushioning, if desired, and insert.

4. Thoroughly clean interior of lens case with hot water and air dry after each use.

5. Discard solution 90 days after opening. Record date opened in space provided on bottle label.

Note: When used daily, Boston Conditioning Solution will be depleted before 90 days. Lens cases should be replaced monthly to avoid potential microbial contamination and ocular irritation.

How Supplied: Boston Conditioning Solution is supplied sterile in 3.5 fluid ounce (105 mL) bottles. All retail Boston® Solutions are packed in unit cartons. Bottles are sealed with an imprinted neckband and marked with a lot number and expiration date.

Do not use if imprinted neckband on bottle is broken or missing.
