3. Stand the case on its lid on a flat surface. Open lens baskets. Place your left and right lenses on the domes inside the baskets (left side is green and marked with the letter “L”). Close the baskets taking care not to trap the lenses.
4. After both lenses are removed from the eyes, take each lens from its holder and place into the palm of your hand. Apply 2 - 4 drops of PeroxiClear and gently rub lenses for 5 seconds on each side.
5. Return lenses to the appropriate basket, taking care not to trap the lens.
6. Hold the lens case lid and rinse each lens for 5 seconds in the baskets with PeroxiClear over a sink or basin.
7. Fill the lens case up to the fill line with fresh PeroxiClear then immediately place the holder basket into the lens case. Screw the lid on the case and store lenses in upright case for at least 4 hours. Do not shake or invert case once filled.
8. Your lenses will be ready for wear after soaking for 4 hours.
9. Once lenses are removed from the baskets, discard any remaining solution from the lens case, rinse the case with PeroxiClear over a sink or basin, and leave the lid off the case to air dry.
10. Some RGP users may experience a mild, temporary skin discoloration (bleaching) to their fingers or hands while rubbing their lenses. Always wash and rinse your hands after rubbing your lenses with PeroxiClear.
11. If desired, each side of the lens may be rinsed for 5 seconds (for a total of 10 seconds) with a sterile saline prior to inserting.

Always follow your eye care professional’s instructions. Based upon your individual tear chemistry and lens-wearing schedule, your eye care professional may recommend additional products or procedures.

Always follow the instructions for use and allow to soak for at least 4 hours. Do not rinse lenses with PeroxiClear before inserting in eyes, or burning or irritation may result. If you accidentally get unneutralized PeroxiClear in your eyes, remove lenses immediately and flush eyes with large amounts of water or sterile saline. If burning or irritation continues, seek help from an eye care professional.

If you experience discomfort, excessive tearing, vision changes, redness of the eye, immediately remove your lenses and promptly contact your eye care professional. It is recommended that contact lens wearers see their eye care professional twice each year, or if directed, more frequently.

WARNING: PROBLEMS WITH CONTACT LENSES AND LENS CARE PRODUCTS COULD RESULT IN SERIOUS INJURY TO THE EYE.

It is essential that you follow your eye care professional’s directions and all labeling instructions for proper use and care of your lenses and lens care products. Eye problems, including corneal ulcers, can develop rapidly and lead to loss of vision. Daily wear lenses are not indicated for overnight wear and should not be worn while sleeping. Clinical studies have shown that eye problems including corneal ulcers are more prevalent in extended wear contact lens users who do not follow the recommendation prescribed by your eye care professional. Clinical studies have shown that there is an increased incidence of serious adverse reactions in extended wear contact lens users as compared to daily wear contact lens users. Studies have also shown that smokers have a higher incidence of adverse reactions. If you experience eye discomfort, excessive tearing, vision changes, redness of the eye, immediately remove your lenses and promptly contact your eye care professional. It is recommended that contact lens wearers see their eye care professional twice each year, or if directed, more frequently.

Failure to discard solution from lens case after each use or use of water to care for your lenses may lead to contamination resulting in eye infection, eye injury, and potential loss of vision.

Important Safety Information:
- Always follow the product directions for use. Failure to follow product directions may lead to vision loss.
- Always use the enclosed special lens case and neutralizing disc with PeroxiClear.
- Do not insert PeroxiClear bottle over contact lens or, the lens, directly into the eye until complete neutralization of the solution has occurred (minimum 4 hours).
- Do not rinse lenses with PeroxiClear® solution prior to inserting lenses into your eyes. If desired, each side of the lens may be rinsed for 5 seconds (for a total of 10 seconds) with a sterile saline prior to inserting.
- Very light, eye hygiene must be maintained regularly.
- Always wash and dry hands thoroughly before handling lenses.
- Do not use tap water, bottled water, or saline with lenses or lens care products.
- Only use fresh solution to clean and disinfect contact lenses. Do not reuse or “top off” old solution in your lens case.
- Always discard any remaining solution in your lens case after each disinfection cycle.
- Saline or rewetting drops will not disinfect your lenses. Always replace your solutions, lenses, and lens case as directed.
- To avoid contamination, do not touch tip of container to any surface. Replace cap after using.
- Not for use with heat (thermal) disinfection.

Precautions:
- Always discard solution from lens case after each use.
- Keep the bottle tightly closed when not in use.
- Store solution at room temperature. Do not freeze.
- Use before the expiration date marked on the carton and bottle.

- Discard bottle and lens case 90 days after opening or after 35 uses, whichever occurs first.
- Keep out of reach of children. Do not mix or substitute other lens care hydrogen peroxide products or lens cases. Do not use any other disinfection solutions in the lens case. DO NOT USE OVER-THE-COUNTER GENERIC HYDROGEN PEROXIDE. Generic hydrogen peroxide solutions are not intended for ophthalmic use and may contain ingredients not intended for use on ocular surfaces or toxicity. Generic hydrogen peroxide may contain ingredients that cause DISCOLORATION OR DAMAGE YOUR CONTACT LENSES.

Adverse Reactions (Problems and What To Do):
The following problems may occur: eye stings, burn or itch (irritation), comfort is less when lens was first placed on the eye, feeling of something in the eye (foreign body, scratching sensation), excessive watering (tearing) of the eye, unusual eye secretions, redness of the eye, reduced sharpness of vision (poor visual acuity), blurred vision, rainbow or halos around objects, sensitivity to light (photophobia), or dry eyes. If you notice any of the above:

- Immediately remove your lenses.
- If the discomfort or problem stops, then look closely at the lens. If the lens is in any way damaged, do not put the lens back on your eye. Place the lens in the storage case and contact your eye care professional.
- If the lenses appear to be undamaged, repeat the cleaning and disinfection process and reinset them.
- If the lens has dirt, an eyelash, or other foreign body on it, or the problem stops and the lens appears undamaged, clean them again by repeating the instructions for usage to thoroughly clean, rinse, and disinfect the lens.
- If the problem continues, immediately remove the lens and consult your eye care professional.
- If any of the above symptoms occur, a serious condition such as infection, corneal ulcer, neovascularization or iritis may be present. Seek immediate professional identification of the problem and prompt treatment to avoid serious eye damage. Good Lens Care Hygiene:
- Always wash, rinse, and thoroughly dry your hands before you handle your lenses.
- Clean, rinse, and disinfect your lenses each time you remove them.
- Always handle the same lens, the right or the left, first in order to avoid contaminating your other lens.
- After use, always empty and rinse the lens case with fresh PeroxiClear and allow to air dry.

How Supplied: Bausch + Lomb PeroxiClear is available for purchase in cases of 3.8 oz. (90 mL) and 12 fl. oz. (335 mL) plastic bottles and supplied with a new peroxide lens case. Bottles and cartons are marked with a lot number and expiration date. A new lens case is supplied with each purchase. TAMPER RESISTANT: Do not use if safety seal around the bottom cap is broken or missing. 100% Satisfaction Guaranteed. Your satisfaction with PeroxiClear is guaranteed or your money back. If you are not completely satisfied, need to report an adverse event, or need additional product information call 1-800-553-5340.
