Hydrophobic Acrylic Intraocular Lens

**Transmittance**

Body Diameter: 6.0 mm; Overall Diameter: ...

**Spectral**

0.0 to +34.0 Diopters (0.0 to +10.0 in 1.0 Powers)

**Specific Gravity**: 1.19 g/ml

Physicians considering lens implantation under any of the following circumstances should weigh the...

- Microphthalmos or macrophthalmos
- Glaucoma (uncontrolled or controlled with medication)
- Zonular disease producing an inflammatory reaction in the eye or resulting in retinal detachment repair.
- Retinal conditions, previous history of, or presence of, preoperative problems such as corneal edema, secondary glaucoma, preoperative or active posterior uveitis, or diabetic retinopathy.
- Patients with preoperative symptoms of, or history of, pseudoexfoliation syndrome.
- Patients with preoperative or concurrent corneal haze.
- Patients with corneal endothelial damage.
- Patients with previous history of retinal detachment repair.
- Patients with previous history of ocular trauma.
- Patients with previous history of ocular surgery.
- Patients with preoperative macular edema.
- Patients with history of previous eye surgery which may impact stability of the implant.
- Patients with presence of eye infection or preoperative signs of eye infection.
- Patients with preoperative history of eye trauma.
- Patients with preoperative history of eye inflammation.
- Patients with preoperative history of eye surgery.
- Patients with preoperative history of eye trauma.
- Patients with preoperative history of eye infection.
- Patients with preoperative history of eye inflammation.
