

PureVision® Multi-Focal Lenses

The Patient's Perspective: Testimonials from Patients

Testimonial from Karen from Arizona

What? Oh No, I have become my Mother, (now my Mother is a terrific woman). I remember when her arms got too short for her to be able to read the directions on a cake mix. I must have inherited her arms for mine became too short also. I reluctantly bought reading glasses. It seemed I could never find them. I bought another pair and then another, and another. I had about seven pairs of reading glasses in my home. However, none in arms reach when I needed them. I put off going to have my eyesight checked, even though I knew I needed to. That was as plain as the nose on my face, which I could no longer see clearly.

My last Eye Care exam, my eyes had gotten a little bit worse, and my Eye Doctor told me about these new PureVision Multi-Focal contacts. He told me to "Just try them", and if I did not like them, we could always talk about bi-focal glasses (EEK! was my first thought at that). I cannot say enough good things about these contacts. THANK YOU so much for these! I no longer have to hunt down reading glasses and I can see. I LOVE THEM!!!!!! No Bi-Focals for this Grandmother who sees great and has terrific vision with her PUREVISION® MULTI-FOCALS.
