Vision

Comfort

Performance

The overwhelming majority  
of your peers found...

We told you about the exceptional performance of PureVision spherical lenses in 8.3 base curve. Now see what eye care professionals found in a recent study of nearly 7,000 patients.<sup>1</sup>

When PureVision lenses were rated on a scale of 1 to 10:

- the average score for overall vision was **9.0**
- the average patient score for overall comfort was **8.6** – even among patients who previously wore hydrogel lenses

The improved design offers enhanced comfort through a smoother surface, with a 28% lower modulus. It's no wonder eye care professionals approve of PureVision lenses.

**Fit the lens that's scoring high with your peers  
and their patients – Bausch & Lomb PureVision.**
