You should fill your lens case with fresh solution every time you store your lenses, and never “top-off” or re-use solution. You should discard your solution immediately after your lenses have been removed from the lens case. You should not expose or store your lenses in or rinse your lenses case with any water, such as tap, bottled or distilled, or with any non-sterile solution.

Clean, rinse and air-dry your lens case each time you remove your lenses. In order to permit excess solution to drain, you can flip over your lens case while air drying. Replace your lens case frequently, depending upon your hygiene habits.

Failure to discard solution from lens case after each use or use of water to care for your lenses may lead to contamination resulting in eye injury and potential loss of vision. See accompanying instructions for additional important safety information.

Important Safety Information:

- Always follow the product directions for use. Failure to follow product directions may lead to vision loss.
- Visit your eye care practitioner regularly.
- Always wash and dry hands before handling lenses.
- Do not use tap water, bottled water, or air-dry with lenses or lens case.
- Only use fresh solution to clean and disinfect contact lenses.
- Always discard any remaining solution in your lens case after each disinfection cycle.
- Saline or rewetting drops will not disinfect your lenses.
- Always replace your solutions, lenses and lens case as directed.
- To avoid contamination, do not touch tip of container to any surface. Replace cap after using.
- Do not use with heat (thermal) disinfection.

Precautions:

- Always discard solution from lens case after each use.
- Keep the bottle tightly closed when not in use.
- Store solution at room temperature.
- Use before the expiration date marked on the carton and bottle.
- Discard any remaining solution 90 days after opening.
- Keep out of reach of children.

Adverse Reactions (Problems and what to do): The following problems may occur: eyes sting, burn or itch (irritation), comfort is less than when lens was first placed on the eye, feeling of something in the eye (foreign body, scratched area), uncomfortable feeling, excessive watering (tearing) of the eye, unusual eye secretions, redness of the eye, reduced sharpness of vision (poor visual acuity), blurred vision, rainbows or halos around objects, sensitivity to light (photophobia), or dry eyes. If you notice any of the above:

- Immediately remove your lenses.
- If the discomfort or problem stops, then look closely at the lens.
- If the lens is in any way damaged, do not put the lens back on your eye. Place the lens in the storage case and contact your eye care practitioner.
- If the lens has dirt, an eyelash, or other foreign body on it, or the problem stops and the lens appears undamaged, thoroughly clean, rinse and disinfect the lens, then reinsert it.
- If the problem continues, immediately remove the lens and consult your eye care practitioner.
- If any of the above symptoms occur, a serious condition such as infection, corneal ulcer, neovascularization or iritis may be present. Seek immediate professional identification of the problem and prompt treatment to avoid serious eye damage.

Good lens care hygiene:

- Always wash and rinse your hands before you handle your lenses.
- Clean, rinse and disinfect your lenses each time you remove them.
- Always handle the same lens, the right or the left, first in order to avoid mixups.
- After use, always empty and rinse the lens case with fresh Biotrue multi-purpose solution.

How supplied: Biotrue multi-purpose solution is available for purchase in sterile 2 Fl. Oz. (60ml), 4 Fl. Oz. (118ml), 10 Fl. Oz. (296ml) and 16 Fl. Oz. (473ml) plastic bottles. Bottles and cartons are marked with a lot number and expiration date.
