Bausch + Lomb Sensitive Eyes® rewetting drops is a sterile, preserved solution recommended to effectively lubricate, rewet and help prevent film deposit buildup on soft (hydrophilic) contact lenses (including frequent replacement and disposable lenses) for clearer, more comfortable lens wear.

DIRECTIONS:
• During wear, put 2 or 3 drops directly onto each lens whenever needed. Blink several times and wait a few moments.
• If the lens still does not feel comfortable, add another drop.
• If discomfort persists, IMMEDIATELY remove the lens and contact your eye care practitioner.

CONTENTS:
A sterile buffered, isotonic, aqueous solution that contains boric acid, sodium borate, sodium chloride and poloxamine; preserved with sorbic acid 0.15% and edetate disodium 0.1%.

ACTIONS:
Bausch + Lomb Sensitive Eyes® rewetting drops rewets lenses and helps prevent film deposit buildup. Ideal for rewetting extended wear, frequent replacement or disposable lenses, especially after awakening. Also, helps remove particulate matter.

INDICATIONS (Uses):
Use to lubricate and rewet your lenses during wear. If you wear extended wear, frequent replacement or disposable lenses, this solution can be used to rewet your lenses after sleep.

CONTRAINDICATIONS (Reasons not to use):
If you are allergic to any ingredients in Bausch + Lomb Sensitive Eyes® rewetting drops, do not use this product.

WARNINGS: PROBLEMS WITH CONTACT LENSES AND LENS CARE PRODUCTS COULD RESULT IN SERIOUS INJURY TO THE EYE.
It is essential that you follow your eye care professional’s directions and all labeling instructions for proper use and care of your lenses and lens care products, including the lens case. Eye problems, including corneal ulcers, can develop rapidly and lead to loss of vision. Daily wear lenses are not indicated for overnight wear and should not be worn while sleeping. Clinical studies have shown the risk of serious adverse reactions is increased when these lenses are worn overnight. Extended wear lenses should be regularly removed for cleaning and disinfection or for disposal and replacement on the schedule prescribed by your eye care professional. Clinical studies have shown that there is an increased incidence of serious adverse reactions in extended wear contact lens users as compared to daily wear contact lens users. Studies have also shown that the risk of serious adverse reactions increases the longer extended wear lenses are worn before removal for cleaning and disinfection or for disposal and replacement.

Studies have also shown that smokers have a higher incidence of adverse reactions. If you experience eye discomfort, excessive tearing, vision changes, redness of the eye, immediately remove your lenses and promptly contact your eye care professional.

It is recommended that contact lens wearers see their eye care professional twice each year, or if directed, more frequently.

To avoid contamination of your solution or your lenses:
• Do not touch tip of container to any surface.
• Replace cap after using.
• Do not transfer this solution to other bottles or containers.
• Not for use with heat (thermal) disinfection.

PRECAUTIONS:
• Always clean, disinfect, rinse and soak your lenses each time they are removed.
• Keep the bottle tightly closed when not in use.
• Store solution at room temperature.
• Use before the expiration date marked on the bottle and the carton.
• Keep out of the reach of children.

ADVERSE REACTIONS (Problems and what to do):
The following problems may occur: eyes sting, burn or itch (irritation), comfort is less than when lens was first placed on the eye, feeling of something in the eye (foreign body, scratched area), excessive watering (tearing) of the eye, unusual eye secretions, redness of the eye, reduced sharpness of vision (poor visual acuity), blurred vision, rainbows or halos around objects, sensitivity to light (photophobia), or dry eyes.

If you notice any of the above:
• IMMEDIATELY REMOVE YOUR LENSES.
If the discomfort or problem stops, then look closely at the lens.
• If the lens is in any way damaged, DO NOT put the lens back on your eye.
Place the lens in the storage case and contact your eye care professional.
• If the lens has dirt, an eyelash, or other foreign body on it, or the problem stops and the lens appears undamaged, thoroughly clean, rinse and disinfect the lens, then reinset it.
• If the problem continues, IMMEDIATELY remove the lens and consult your eye care professional.

If any of the above symptoms occur, a serious condition such as infection, corneal ulcer, neovascularization or iritis may be present. Seek immediate professional identification of the problem and prompt treatment to avoid serious eye damage.

All adverse reactions observed while using Bausch + Lomb Sensitive Eyes® rewetting drops should be reported to:
Bausch & Lomb, Rochester, NY 14609, 1-800-553-5340.

GOOD LENS CARE PRACTICES:
• Always wash and rinse your hands before you handle your lenses.
• Clean, rinse and disinfect your lenses each time you remove them.
• Always handle the same lens, the right or the left, first in order to avoid mix-ups.
• After use, always empty and rinse lens case with fresh rinsing solution, and allow to air dry.
• When wearing disposable lenses, each time you remove a lens, discard it and replace it with a new lens.

HOW SUPPLIED:
Bausch + Lomb Sensitive Eyes® rewetting drops are available for purchase in 0.5 fl. oz. (15 mL) plastic bottles. Bottles and cartons are marked with a lot number and expiration date.
