**Akreos**

Advanced Optics Aspheric Lens

---

**NOTE:**

Please refer to the Directions for Use with the insertion instrument for complete instructions and cautions.

---

**PHYSICAL CHARACTERISTICS**

- **Refractive index of lens when in the eye at 35°C:** 1.458
- **Refractive index of lens when wet at 20°C:** 1.459

---

**LENS POWERS AVAILABLE**

- **Optic/Haptic Interface:**
  - The haptic features are top right (A) and bottom left (B) when the lens is in the eye.

---

**Open the carton and remove the sterilized pouch containing the lens vial. Gradually peel the pouch apart to ensure that measured BCVA was not impacted by this procedural deviation. BCVA at visits through Form 3 were not previously expected in nature, severity or degree of incidence should be reported within five (5) days.**

---

**注册号 (USA)**

**REV. 2018-08**

---

**Customer Service. Opened or unopened lenses will be exchanged for a comparable dollar value, provided they are unopened and in the original unopened container. All lenses being returned must be accompanied by an authorization number issued by Bausch + Lomb Customer Service. Returned lenses must be accompanied by a completed Return Authorization Form.**

---

**As of April 2006, there were 356 Akreos study implants and the overall incidence of adverse events is 3.5%. The outcomes related to spherical aberration and total higher-order aberrations were not interpretable due to the small number of patients. Photopic and mesopic contrast sensitivity at 3-months postoperatively were not clinically or statistically significantly different between the aspheric and the spherical IOL populations.**

---

**CUMULATIVE ADVERSE EVENTS**

- **Macular Edema:** 1.4 / 3.0
- **Cataract:** 20 / 25

---
